

LOOPING CONSTRUCTS:

Repeating the same set of instructions more than one is known as looping. For every loop there must be condⁿ to control the loop otherwise it will be an untrminated loop.

"C" Language provides following looping constructs.

- ① While loop
- ② Do while loop
- ③ For loop.

① While loop:

Syntax

```
while (condn!)  
{  
    st. st+1  
    "  
    "  
}
```
