

1. Write a program to display sum of equal row ^{write}

```
#include <stdio.h>
```

```
void main()
```

```
{  
    int a[10][10], m, n, i, j, sum = 0;  
    clrscr();
```

```
    printf("\n Enter order of Matrix A :");  
    scanf("%d %d", &m, &n);
```

```
    printf("\n Enter elements of Matrix A : \n");  
    for (i = 0; i < m; i++)
```

```
    {
```

```
        for (j = 0; j < n; j++)
```

```
        {
```

```
            scanf("%d", &a[i][j]);
```

```
        }
```

```
    }
```

```
    printf("\n Rowwise sum : \n");
```

```
    for (i = 0; i < m; i++)
```

```
    {
```

```
        for (j = 0; j < n; j++)
```

```
        {
```

```
            sum = sum + a[i][j];
```

```
        }
```

```
        printf("\n Row %d sum = %d", i+1, sum);
```

```
        sum = 0;
```

```
    }
```
