

58] Write a program to count and display number of digits from a given integer no/.

```
→ #include <stdio.h>
void main()
{
    int num, digit, cd=0;
    clrscr();
    printf("\nEnter an integer Number:");
    scanf("%d", &num);
    while (num > 0)
    {
        digit = num % 10;
        cd++;
        num = num / 10;
    }
    printf("\n\n Number of Digits : %d", cd);
    getch();
}
```

Output :

Enter an integer Number : 5463

Number of digits are: 4
