

21) Write a program to convert given temperature
Fahrenheit to Celsius.

```
#include <stdio.h>
```

```
void main()
```

```
{
```

```
int temperature, fahrenheit;
```

```
clrscr();
```

```
float temp-c, temp-f;
```

```
printf("Enter the value of temperature in Celsius");
```

```
scanf("%f", &temp-c);
```

```
temp-f = (1.8 * temp-c) + 32;
```

```
printf("The value of Temperature in Fahrenheit is : %f",
```

```
temp-f);
```

```
getch();
```

```
}
```

22) Write a program to convert Celsius to Fahrenheit.
