```
rem = num % num2;
printf ("\n Reult rem = %d", rem);
    getch();
}
```

③ To find area of a square

Ist Method

```
#include <stdio.h>
void main()
{
    float  side , area;
    clrscr();
    printf("\nEnter sides of square:");
    scanf ("%f", &side);
    area = side x side;
    printf ("\n Area of square = %f", area);
    getch();
}
```

④ IInd Method

```
#include <stdio.h>
void main()
{
    float  side , area;
    clrscr();
    printf("\nEnter side of square:");
    scanf ("%f", &side);
    area = pow(side, 2);
    printf ("\Area of square = %f %.2f", area);
    getch();
}
```
