59) Write a program to deply sum of digits of given intiger number.

```c
→ #include <stdio.h>
  void main()
  {
    int num, digit, sd =0;
    clrscr();
    printf("\n Enter an intiger Number :");
    scanf(" %d", &num);
    while (num>0)
    {
      digit = num %10;
      sd+ = digit;
      num = num/10;
    }
    printf("\n \n sum of digits : %d", sd);
    getch();
  }
```

output:

Enter an intiger number : 5423

Sum = 14
