```c
        h=a;
else
    h=b;
printf("\n Highest of Two Numbers :%d",h);
getch();
}
```

35) Same program using conditional operator

```c
#include <stdio.h>
void main()
{
    int a,b,h;
    clrscr();
    printf("\n Enter Two Numbers:");
    scanf("%d%d", &a, &b);
    h= (a>b) ? a : b;
    printf("\n Highest of Two Numbers :%d", h);
    getch();
}
```

36) Write a pgm to deeply lowest of given two numbers using if else

```c
#include <stdio.h>
void main()
{
    int a,b,l;
    clrscr();
    printf("\n Enter Two Numbers:");
    scanf("%d%d", &a, &b);
    if (a<b)
```
