```
else
printf ("\n Given Number is NAGATIVE");
   getch();
}
```

33) Write a program to check weather given number is +ve, -ve or zero wing if else if ladder.

```
#include <stdio.h>
void main()
{
int num;
clrscr();
printf("\n Enter a Number :");
Scanf(" %d", &num);
if (num==0)
printf("\n Given Number is ZERO");
else if (num>0)
printf("\n Given Number is POSITIVE");
else
printf ("\n Given Number is NAGATIVE");
getch();
}
```

34) Write a program to deiply highest of given two no/.

```
#include <stdio.h>
void main()
{
int a,b,h;
clrscr();
printf("\n Enter Two numbers :");
Scanf(" %d %d", &a ,&b);
if (a>b)
```
