```c
    l = a;
else
    l = b;
printf("\n Lowest of Two Numbers : %d", l);
getch();
}
```

57) Same pgm using conditional operator

```c
#include <stdio.h>
void main()
{
int a, b, l;
clrscr();
printf("\n Enter Two Numbers:");
scanf("%d %d", &a, &b);
l = (a<b) ? a : b;
printf("\n lowest of Two Numbers : %d", l);
getch();
}
```

58) Write a pgm to deaply highest and lowest of two numbers using if else.

```c
#include <stdio.h>
void main()
{
int a, b, l, h;
clrscr();
printf("\n Enter Two numbers :");
scanf("%d %d", &a &b);
if (a>b)
{
```
